

What is Scopes Carbon?

Scopes Carbon helps businesses by offsetting carbon emissions from their travel and business mileage by using certified carbon offsetting projects that protect forests and plant trees to bridge the gap until cleaner solutions are viable.

How it works :

- 1** Book a conference at the Castle Green Hotel and mention Scopes Carbon to the Conference Co-ordinator
- 2** We will add £1.00 per delegate to your booking which will be donated to Scopes Carbon to cover up to a 100 mile round trip
- 3** Scopes Carbon calculate your teams travel emissions using UK government approved conversion factors
- 4** Scopes Carbon select the appropriate certified scheme to offset your carbon emissions such as UK tree planting projects
- 5** That is it! Travel to your conference at the Castle Green Hotel and make your conference greener!
